It is the policy of the Student Health Center of the University of Mount Union that students who obtain diagnostic tests, medical consultations, or other treatments at the Student Health Center receive appropriate follow-up care.

Policy Details

If a student has an x-ray, diagnostic test or medical consultation, the results will be provided to the student during his or her follow-up appointment at the Student Health Center. It is the student's responsibility to return to the Student Health Center to obtain x-ray and diagnostic test results or to receive follow-up care. Unless the x-ray, diagnostic test or medical consultation indicates a serious and/or emergency medical condition, the Student Health Center will make one telephone call to the student to inform him or her of the need to return to the Student Health Center, to schedule or re-schedule appointments, or to follow-up with any treatments or other care. If a student is not available when a telephone call is made to him or her, the Student Health Center will contact the student by e-mail.

Member: American College Health Association and Ohio College Health Association.

Responsibilities

Position or Office	Responsibilities
Health Center	Focuses on health promotion, health protection, disease prevention, and clinical care. The main purpose of the Health Center is to provide medical care for students who have short term illnesses and injuries.
